Policy Statement

The Work Health Safety Management System (WHSMS) is the framework of how WHS is organised in the workplace. This policy and procedures manual contains all the basic procedures for safe work. WHS records and information is retained on the GELSafe. The self-audit in GELSafe is completed every twenty-six (26) weeks as a gap analysis to help direct the process of continuous improvement.

Scope

This procedure applies to the whole Centre and all staff.

Responsibilities

Management has the responsibility to:

- Collect information
- Ensure the self-audit with GELSafe is completed every 26 weeks
- Complete the action items identified and provide resources for their implementation

Staff have the responsibility to:

- Raise issues with management to ensure there is an effective program of continuous improvement at the Centre

Procedure

- The self-audit will be completed either at management level or by delegating to other designated staff member
- The results of the self-audit will be discussed through the consultation process and at staff and management meetings
- Actions will be completed within the designated time frame
- Monitor and review of the items will occur regularly to determine their effectiveness

External WHS Management System Audit

In addition to the internal audit process an independent third-party audit may be performed by an Accredited WHS Auditor. The Audit will be conducted on the agreed date and the Auditor will hand back the documentation to the Manager. In most instances, the Auditor will provide a report to the Management, detailing the results of the Audit and where recommendations for changes are to be made. Management will review the recommendations and determine follow up action.
